Integrated Barcoding Systems announces the release of their new software, *QuikTrac*[®] 5.5

Adrian, Michigan – August 1, 2008 – Integrated Barcoding Systems (IBS), a leading solutions provider of data collection technology and services, today announced the release of their latest software *QuikTrac*[®] 5.5. “We continue to grow and add to our *QuikTrac*[®] software to make it one of the best solutions on the market today”, said Andy Jacobs, President of Integrated Barcoding Systems.” Our product development and enhancements are centered on what our customer’s needs are and what they would like to see in each new release”.

One of the new enhancements of *QuikTrac*[®] 5.5 was to add the ability to click on a specific user and view what they have been doing. This is helpful when training new users on the system and catching errors that may occur.

Integrated Barcoding Systems development team continues to add features and functionality to meet the ever changing market place. Watch for upcoming breaking news on new ERP interfaces and new modules in the near future.

Integrated Barcoding Systems data collection solutions are designed to provide users of ERP and MRP systems with the fastest, simplest and most cost-effective tools to automate their data collection process. *QuikTrac*[®] has successful installations into MAPICS, Infor-SyteLine, BAAN, BPCS, J.D. Edwards, PRMS, JobScope, System 21, CMS, PC based Systems, and AS/400 legacy systems. Integrated Barcoding Systems is headquartered at 1801 West US 223, Suite 115, Adrian, MI 49221.
