Integrated Barcoding Systems announces integration into Microsoft-AX

Adrian, Michigan –Integrated Barcoding Systems (IBS), a leading solutions provider of data collection technology and services, today announced the release of their latest software ERP integration into Microsoft-AX. “We continue to grow and add to our *QuikTrac* software to make it one of the best solutions on the market today”, said Andy Jacobs, President of Integrated Barcoding Systems.” “Our *QuikTrac* software is so flexible and easy to use that when we were presented with the opportunity to solve a customers data collection needs into Microsoft-AX, it was fast and simple to complete.”

With our new .Net interface released in *QuikTrac* 5.5, we are now able to extend the flexibility and functionality that was a part of our software over the years. Our customers have come to appreciate that they can take our *QuikTrac* software and grow their solutions. As Microsoft continues to enhance their software solution and grow, QuikTrac users can take advantage of their own transaction development and keep their costs down.

Integrated Barcoding Systems development team continues to add features and functionality to meet the ever changing market place. Watch for upcoming breaking news on new ERP interfaces and new modules in the near future.

Integrated Barcoding Systems data collection solutions are designed to provide users of ERP and MRP systems with the fastest, simplest and most cost-effective tools to automate their data collection process. *QuikTrac* has successful installations into MAPICS, Infor-SyteLine, BAAN, BPCS, J.D. Edwards, PRMS, JobScope, System 21, CMS, BAAN, Made 2 Manage, and AS/400 legacy systems. Integrated Barcoding Systems is headquartered at 1801 West US 223, Suite 115, Adrian, MI 49221.

Microsoft and Microsoft AX are registered names and products of Microsoft Corporation
